

# EXPANDED Clinical Trials

MATCHING PROVIDERS AND  
CONSENTED PATIENTS WITH PRECISION  
BASED ON MOLECULAR  
AND CLINICAL PROFILES

## Find Patients Faster

Enroll patients based on cancer type, molecular signatures, and clinical characteristics

## Reduce Cost of Outreach

With precision matching to patients and providers

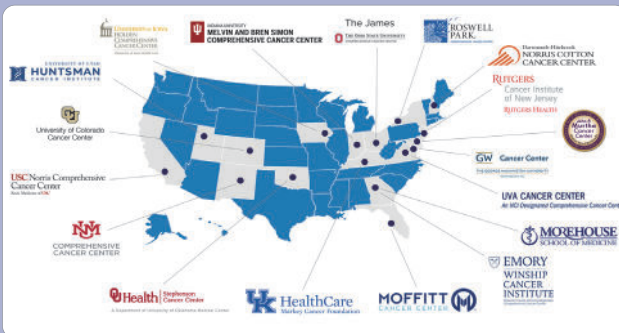

## Expand Your Insights

Gain actionable data and elevate your study design with rich clinicogenomic patient data

## Leverage Lifetime Tracking

Identify patients at any point in their journey and monitor response to treatment over time

## One-of-a-Kind Alliance

By bringing together a diverse cross-section of patients, clinicians, and researchers through our patented Total Cancer Care® (TCC) protocol and the Oncology Research Information Exchange Network® (ORIEN), Aster Insights is helping clinical researchers accelerate the development and delivery of personalized cancer therapies to help countless patients worldwide.
